Management Discussion and Analysis

Mahindra Holidays & Resorts India Limited ('Mahindra Holidays' or 'the Company') is a leading player in the leisure hospitality industry. Founded in 1996, it has established vacation ownership in India, and is the market leader in the business. It offers holidays to its customers that are designed for the discerning and differentiated needs of families. Apart from providing quality rooms in the form of furnished apartments and cottages at resorts in unique and popular destinations, Mahindra Holidays offers its members family-friendly amenities including dining, holiday activities, spa and wellness facilities for a complete holiday experience.

This chapter presents an overview of the markets and opportunities as well as the operational and financial performance of the Company during 2015-16. It also highlights Mahindra Holidays' strategy, and discusses important initiatives taken by the Company during the year to achieve its growth and performance objectives.

Introduction and Key Achievements

Mahindra Holidays' focus during 2015-16 was to achieve continued success in its strategic objective: ensuring that its growing membership gets the best holiday experience. Although the macroeconomic environment witnessed steady improvement, consumer confidence and disposition towards high-value discretionary spends were relatively weak. Despite this, Company's focus on unique family vacation experiences, generating referrals from existing members and focus on digital lead generation, deployment of technology and execution yielded significant improvement in results.

The key highlights are:

- **Mahindra Holidays added around 16,200 members to its vacation ownership business in 2015-16 – taking the total membership base to close to two lakh at the close of 2015-16.** This performance is creditable given the subdued consumer sentiment and was made possible by the Company's successful execution of its marketing strategy, brand building initiatives and a responsive sales organisation. These are discussed in greater detail in the sections on 'Markets and Opportunities' and 'Business Performance'.
- **Mahindra Holidays added 87 new units to its room inventory. Total room inventory touched 2,879 units across its 45 resorts.** Pace of room inventory growth is expected to increase in the near future in line with its long-term strategy for expansion, primarily through own projects and acquisitions. Four projects that are in the pipeline alone are expected to add around 500 units in the next two years. Further details are provided in the section on 'Properties and New Projects'.

- **Mahindra Holidays increased its stake in Holiday Club Resorts Oy, Finland (HCR), to 85.6 per cent. HCR is a leading vacation ownership company in Europe with around 50,000 members and 31 resorts in Finland, Sweden and Spain.** This investment is in line with the Company's vision to widen its international footprint and opens up growth opportunities in Europe and Middle East. Besides, 'Club Mahindra' members will now also have the option of visiting HCR's resorts in Europe.
- **Occupancy rates remained stable around 81 per cent and member satisfaction improved considerably, both in terms of member services and the holiday experience at the resorts.** These are reflected in improved customer-as-promoter and post-holiday feedback scores. A more exhaustive discussion on the initiatives carried out by the Company and their impact can be found in the sections on 'Member Relations' and 'Resort Operations'.
- **Information technology (IT) continued to actively contribute to the Company's growth and performance. During the year, improvement in online services contributed to significant increase in usage by members – online bookings increased from 52 per cent in 2014-15 to 66 per cent in 2015-16.** Better integration and deployment of advanced lead analytics solutions have improved the conversion of digital and referral leads, increasing their contribution to over 50 per cent of sales during the year. More information on important technology-driven initiatives can be found in the section on 'Information Technology'.

Mahindra Holidays markets a high-value discretionary product. In a milieu of subdued consumer spending and sentiment, the Company registered creditable results. The key financial results (standalone) for 2015-16 are given below:

- **Total income (including other income) grew by 19.2 per cent from ₹ 80,756 lakh in 2014-15 to ₹ 96,261 lakh in 2015-16.**
- **Profit before Taxes (PBT), before considering the exceptional item in the previous year, grew by 35.7 per cent from ₹ 12,684 lakh in 2014-15 to ₹ 17,209 lakh in 2015-16.**
- **Profit after Taxes (PAT) grew by 48.5 per cent from ₹ 7,902 lakh in 2014-15 to ₹ 11,735 lakh in 2015-16.**
- **Diluted EPS for the standalone entity increased from ₹ 8.98 in 2014-15 to ₹ 13.29 in 2015-16.**

The rest of this chapter provides details of markets and opportunities, operational and financial performance of the Company, initiatives in the areas of quality, CSR, sustainable development, and key functional areas such as human resources and information technology. The chapter ends with a discussion on risks and concerns, and the Company's outlook for the future.

Markets and Opportunities

Mahindra Holidays is a leading player in the leisure hospitality industry in India. Built on the vacation ownership model, the Company's principal business is to offer vacation ownership products that provide holiday entitlements to its members over the life of the product.

India's macroeconomic scenario witnessed a steady improvement in 2015-16. According to the advance estimates released by the Central Statistical Organisation (CSO), India's GDP growth is expected to be 7.6 per cent in 2015-16, as compared to 7.2 per cent recorded in the previous year. Inflation and fiscal balance of the government, too, remained stable during the year – prompting the RBI to reduce the policy rate by 100 basis points in the course of the year. However, lending rates of banks did not come down by as much, and improvement in consumer sentiment has been comparatively muted. To that extent, the environment for large discretionary spend categories and consumer confidence to commit resources continued to be relatively weak.

The Indian travel and tourism industry is worth USD 112 billion or roughly 7.5 per cent of India's GDP. This is expected to increase to USD 244 billion by 2024, and 81 per cent of this is expected to be contributed by domestic tourism. As far as the vacation ownership industry in India is concerned, the market penetration is still very low. If one compares the Indian vacation ownership industry with the US in terms of its share in the hospitality sector, the scope for growth in India is around five times of its current size. Similar conclusions can be drawn if one considers other surrogates for the size of the opportunity for the Company's products such as ownership and sales of cars.

Clearly, there is a significant headroom for growth of the business. More so, as holidays have become an essential element in the discretionary spend budget of households. Besides, emerging trends in holidaying preferences are also encouraging from the Company's perspective. For instance, holidays with extended families, short breaks and the demand for variety in experiences and destinations are things that the Company is well placed to offer to its customers.

Business Performance

'Club Mahindra' is the Company's flagship product in the vacation ownership business, which entitles its members a week's holiday every year for a period of 10 or 25 years

depending upon the membership. Mahindra Holidays has recorded a fair growth in its membership over the last few years despite the challenging environment. It believes that there is a significant potential for further growth of the business, especially with the Indian economy witnessing a revival in its growth prospects.

Buoyed by early gains of the Company's pull-based marketing strategy – comprising non-intrusive sales channels such as alliances, digital and referrals – implemented in the previous year, the focus during 2015-16 was on expanding its coverage and reach with greater vigour. The main objective was to generate high quality leads, prioritise prospects and increase conversion. Several activities were carried out during the year to support this, some of which are outlined below:

- The Company launched '**Heart-to-Heart**', a member engagement initiative in their hometowns. Events and activities are being carried out where members and their families meet other members to enjoy various leisure activities. This helps in creating a strong sense of belonging to the 'Club Mahindra' community. This also provides an opportunity to update members, seek referrals and solve any issues they might be facing.
- In another initiative to expand the choices available to members in terms of new vacation experiences, the Company made available house boats in Kashmir and sea-facing luxury tents at 'Festa De Diu' – the longest beach festival in Asia. Encouraged by the success, it is actively considering expansion of the bouquet of such unique experiences to its members.
- '**India Travelogue**', a 40 episode weekly TV travel-series is being aired on CNBC Awaaz since September 2015. The series showcases the Company's resorts and the experiences that they offer in the backdrop of the destination's points of interest. It has garnered positive word of mouth for Club Mahindra and generated considerable interest among prospective vacation ownership customers.
- Other engagement and brand building initiatives during the year included setting-up of a mini Club Mahindra resort facility within 'Kidzania', the kids edutainment centre inside R City Mall in Mumbai, to give children a sense of what it would be like to work in the hospitality industry.

To support these initiatives, the Company also carried out extensive advertising and brand-building campaigns in print and television. '**Club Mahindra was selected as a 'Super Brand' for the year 2015 by SuperBrand Council in India.**

in expanding its sales network during the year. At the end of 2015-16, it was present in 137 locations in India, versus 124 in the previous year. Its focus on international markets with sizeable Indian population also saw significant progress, with deepening of its presence in the Middle East by way of two new locations. Contribution of international markets to sales, which was negligible a few years back, also increased to 4 per cent during the year. Going forward, focus will be to expand the footprint, both in India and abroad, as well as to explore alternate channels that are in line with the Company's strategy.

During 2015-16, the Company added around 16,200 members, taking the total membership to close to two lakh as on March 31, 2016. The chart provides details of the growth in membership in the last 10 years.

During the year, the Company introduced 'Xperience Breaks', which offers one week of holiday each in India and international destinations within a year of purchase. It is designed to provide customers a first-hand experience of Club Mahindra membership and is aimed at younger audience in large towns and cities. It is conceived as an exclusively online product and is being marketed through online partnerships.

In line with the Company's strategy, majority of the total inventory is owned by it. In cases where resorts are under long-term lease arrangements, it manages the resorts to ensure delivery of complete range of services to its members. Even in resorts where rooms/units are made available to members through inventory arrangements, sufficient measures are implemented to give members the best holiday experience.

Increasing room inventory in line with membership additions continues to be a key focus area. **The Company is currently undertaking four projects: Naldhera (Shimla), Assanora (Goa), Ashtamudi (Kerala) and expansion at Kandaghat (Shimla), which are in different stages of planning and development.** Besides, it is also considering acquisition opportunities in different parts of the country. It is expected that these initiatives would eventually add around 700 units to the Company's inventory over the next few years.

Apart from this, the Company also has land bank at nine destinations across six states. Efforts are on to expand this further. Some of its existing resorts also have additional land that can be utilised for further expansion. This will provide the flexibility to build such destinations and add room inventory on an ongoing basis.

Resort Operations

Efficient resort operations are central to delivering a holiday experience that meets the expectations of the members. This encompasses three key areas: infrastructure and facilities, holiday activities, and food and beverage (F&B).

As a Company marketing long duration products and services, Mahindra Holidays ensures that quality of infrastructure and facilities are well maintained and upgraded regularly to meet customer expectations. During the year, investments were made to upgrade rooms and common areas across multiple locations. At the same time, focus was also on deploying sustainable and environment friendly technologies such as installation of compost machines and upgrading sewage treatment plants. Spa facilities, which are on offer in 26 resorts, saw introduction of new concepts, therapies and amenities during the year.

Holiday activities continue to be an important focus area. All resorts have activities built around the themes of learning, adventure, relaxation and local experiences, depending on the terrain and type of holiday the destination offers. New activities introduced during the year included cricket simulators, virtual golf and wall climbing. These, along with other activities such as archery and trampoline, will be extended to other resorts in the future. In the area of food and beverage (F&B), efforts are continuously made to increase the variety and make the dining experience more exciting. During the year, the Company launched new dining concepts and restaurants. One new concept is the extension of 'Fun Dining' by bringing together dining with entertainment, music and games for the whole family in an exciting ambience. New restaurants included those featuring cuisines such as Italian, BBQ and Seafood. The Company also introduced 'live counters' and 'regional speciality menus' in selected resorts, besides carrying out unique food promotions. 'Gourmet Express', the Company's innovative in-room dining offering introduced during the previous year, was rolled-out in all its resorts and has been received well by the members.

Mahindra Holidays has institutionalised 'post-holiday feedback' (PHF), which encompasses all key areas of resort operations. This serves as the measure of its success in delivering quality holiday experience to the members as well as identifying and addressing their concerns. ***PHF scores have shown consistent improvement since the inception of the programme. During 2015-16, the overall PHF score stood at 4.2 compared to 4.1 in the previous year.***

Human Resources (HR)

Given the highly specialised nature of the Company's business and the large number of locations where it operates, attracting and nurturing the right talent is at the core of your Company's strategy for success and growth. Accordingly, the HR function at Mahindra Holidays is organised into three key areas: customer acquisition, resort operations and corporate functions.

During the year, focus was on building capabilities through a structured approach to drive the Company's performance. This encompassed implementing changes across all components of the HR function: recruitment, employee engagement, reward and recognition, skill upgrading, talent management, organisational culture and employee relations. Key developments are discussed below.

In the area of customer acquisition, the Company introduced 'I-ExCEL', a sales training workshop for front-line sales executive, which covered 100 percent of eligible employees, and a mentoring programme where around 80 managers underwent extensive training to build capability as mentors. Over 200 executives have subsequently been identified to be trained by these mentors.

In the area of resort operations, the Company introduced a comprehensive skills training and certification programme for all key functions: F&B, food preparation, front office and housekeeping. It also rolled-out a fast track programme for top performers, with the objective of grooming supervisory and managerial talent from within the organisation for new resorts. During the year, the Company also carried out a scientific benchmarking exercise to optimise and redeploy people across functions and resorts.

On the corporate and organisational development front, the Company regularly nominates executives to participate in development programmes and workshops to enhance their skills. During the year, customised workshops were prepared to align the employees with the culture and business goals of the organisation.

Apart from the specific programmes introduced during the year, the Company continues to provide induction and operational training to its employees. **During the year, the Company provided 30,000 man days and 35,000 man days of training in the areas of customer acquisition and resort operations respectively. Overall, each employee received an average of 11.1 man days of training in 2015-16, up from 7.5 man days in the previous year.**

2015-16 was an important year where the Company transitioned to a new learning and development paradigm based on assessing and building competencies in a structured manner. Going forward, focus will be on institutionalising these initiatives across the organisation. As on March 31, 2016, there were 3,784 people on the rolls of the Company. Industrial and employee relations remained cordial throughout the year.

Quality

Mahindra Holidays has adopted the principles of Total Quality Management (TQM) under the banner of 'The Mahindra Way' (TMW) — the Mahindra Group's integrated approach to promote excellence in all spheres of its operations. The Company has successfully institutionalised quality systems in all critical business functions. During the year, the Company witnessed a focussed approach to TMW with participation from all functions and sections of employees. Some of the key developments during the year are discussed below.

One of the biggest achievements in the area of business excellence and quality during the year was the propagation of the Kaizen culture. In December 2015, the Company launched a Kaizen festival to sensitise employees on quality tools and techniques. Participation in the festival went beyond the customer facing functions — such as member relations (MR), resort operations and customer acquisition — and included finance, purchase, legal, marketing and HR. **As a result, the number of Kaizen projects increased over five-fold from 1,000 in 2014-15 to around 6,400 in 2015-16.** The Daily Work Management (DWM) and the plan-do-check-act (PDCA) cycle approach continue to help the MR function to reduce complaints and improve customer satisfaction. Also, resorts have been consistently able to retain and improve upon their PHF scores.

The skills of the Business Excellence (BE) team, which is responsible for in-house training and development of employees, was enhanced by conducting specialised program in quality tools such as 7QC. During the year, participants from MR function underwent training on the QC story methodology and have successfully completed improvement projects. Failure Mode and Effects Analysis (FMEA) tools continue to be utilised for proactive identification of gaps and implementation of suitable preventive actions.

The standardisation process by way of Standard Operating Procedures (SOPs) have already been actively deployed across the resorts. During the year, SOPs were created and adopted for two important support functions, viz. purchase and projects.

Audits are an integral part of process improvements. DWM and ISO audits are conducted regularly. With an increased focus on internal audits, the frequency and coverage has also increased significantly. During the year under review, the BE team had created a centralised dashboard for resorts, enabling access to hard data for preventive and corrective action. Several modules were added to the dashboard during the year, increasing its utilisation and efficacy. Overall, TMW practices are getting increasingly integrated in the business functions, and have started contributing to the Company's performance.

Information Technology (IT)

Mahindra Holidays believes that technology today plays an active role in providing a competitive edge in the market and contributes directly to meeting business goals. The

Company has invested significant resources in upgrading its IT architecture and is benefiting in all key spheres of its operations – be it customer acquisition, resort operations, member relations or internal controls.

As mentioned earlier, online services continue to be a key focus area for the Company. During 2015-16, the Company launched an upgraded website on a cloud-based architecture, which increased availability, speed, and peak load handling capacity. For members, a host of features were added: online payments using NEFT and e-wallets, waitlisted bookings, online referral and exclusive online offers. From the point of view of prospects, the new website simplified the process of getting information about products and resorts as well as raising membership related enquiries with the Company. These measures have considerably increased online usage and operational efficiencies.

The Company also launched a micro-site for its new one-year product 'Xperience breaks', which allows customers to view and buy the product online. Seamless integration with the Company's payment gateway as well as the inventory and reservation engine has ensured that customers have a smooth experience while purchasing the product and in making reservations. As an exclusively online product, features were built into the website to enable channel partners to access information and increase the visibility of the product.

During the year, the Company made significant progress in its bid to integrate its CRM, Web and SAP-based systems – with the ultimate aim of having a unified view of the customer throughout his engagement with the Company. This will help in designing and implementing customer-centric processes, and improving the overall efficiency of operations. For instance, this integration has paved the way for the Company to develop a full-feature mobile app for its members, which is expected to be launched in 2016-17.

The previous year's report discussed initiatives in the area of business analytics. During 2015-16, the Company implemented advanced models to value and prioritise leads generated from its marketing efforts, referrals and digital channels. These have now been institutionalised in the customer acquisition function resulting in better targeting of effort, and have contributed significantly to sales performance. Another area where the IT infrastructure and analytical prowess has been put to use is the increase in coverage and quality of real-time MIS and dashboards. This has resulted in considerable strengthening of controls in areas of finance, procurement and material management.

Corporate Social Responsibility (CSR)

As a part of the Mahindra Group, the Company has been at the forefront of taking affirmative action and seeks to contribute to the socio-economic well-being of the communities that it interacts with in carrying out its business.

Mahindra Holidays' initiatives in this area are carried out in line with these long term objectives. Accordingly, the Company has set a roadmap that identifies the key areas of focus and parameters that are monitored to measure progress in its sustainability journey. The Company believe that practicing sustainable development makes good business sense and it considers the impact of its actions in making business decisions, thereby demonstrating its commitment to the global sustainable development effort.

Some of the key areas that have been identified for implementing sustainable practices include carbon footprint measurement, conservation of biodiversity and assessment, environment, energy and water, sourcing and community development. During the year, a number of activities were carried out across resort locations. These include use of solar power; environment-friendly energy and water saving equipment; timers and motion sensors for lighting of common areas and other loads where continuous power is not required; eco-friendly bio-block sewage treatment plants and organic waste compost machine for wet garbage process. Across the Company's resorts, all CFLs are being replaced by LED lamps.

Other than these, awareness drives were conducted for the employees and members at resorts about climate change, environment and biodiversity. Training programmes for segregation of waste were successfully implemented at several resort locations. Holidaying members also participated in various activities aimed at generating awareness on water scarcity and pollution.

The Company actively participates in the Mahindra Group's journey for Corporate Sustainability Reporting. The 'Sustainability Report' of the Group is prepared in accordance with the internationally accepted framework specified by the Global Reporting Initiative (GRI). Internal Controls

The Company has an adequate internal control system, commensurate with the size and nature of its business. The system is supported by documented policies, guidelines and procedures to monitor business and operational performance which are aimed at ensuring business integrity and promoting operational efficiency. During the year under review, the Company engaged a reputed firm specialising in implementation of internal controls to test the effectiveness of existing controls (both manual and system-based) and to fix any issues related to financial reporting and key non-financial processes.

The Company has an Internal Auditor who oversees the entire internal audit function. However, given the size of its operations in terms of number of resort locations and nature of its business, it also uses services of independent audit firms to conduct periodic internal audits in line with an audit plan that

is drawn at the beginning of the year. This audit plan, prepared by the Internal Auditor, is approved by the Audit Committee and the Board of Directors. The scope of the exercise includes ensuring adequacy of internal control systems, adherence to management policies and compliance with the laws and regulations of the country. The Internal Auditor also reports on the implementation of the audit recommendations.

The Company's ERP system has appropriate controls embedded in its processes and systems to reduce the need and reliance for compensating manual controls. These have also been strengthened from time to time, and the standardisation has been a significant source of comfort given the number of locations in which the Company operates.

Internal audit reports are placed periodically before the Audit Committee of the Board of Directors, which reviews the adequacy and effectiveness of the internal control systems and suggests improvements for strengthening them.

Threats, Risks and Concerns

Mahindra Holidays' risk management framework consists of identification of risks, assessment of their nature, severity and potential impact, and measures to mitigate them. This framework is in place for adequate and timely reporting and monitoring. Risks are reviewed periodically and updated to reflect the business environment and change in the size and scope of the Company's operations.

Economic Risks

Although the macroeconomic situation appears to be stable, cyclical downturns may continue to resurface in the future. Besides, even with the current environment of stable growth and benign inflation, interest rates continue to be relatively high. As a result, consumer confidence to commit resources continue to be relatively weak. As a material portion of the Company's revenue comes from discretionary spending of consumers, this can adversely impact the Company's ability to generate sales and affect its growth prospects.

The Company recognises these risks and has measures in place to mitigate the impact of adverse macroeconomic situation. This includes focusing on pull-based strategy for customer acquisition through referrals and targeted digital marketing, which allows it to reach the right segments and at the same time ensures higher conversion to sales. The Company is also in the process of ramping up its international marketing network to increase their contribution to the sales mix. Another initiative taken during the year was introduction of a one year product 'Xperience Breaks', which allows the Company to reach out to younger prospects who are not ready to commit themselves for the longer duration offerings.

Operational Risks

Operational risks mainly relate to meeting customer expectations in terms of quality of service and maintaining a balance between the inventory of resorts and growth of customers. These assume significance given the long service duration of the key products. As there are multiple choices,

both in terms of location and dates, there could be occasions where the first choice of holiday requested by the customers may not be available, which may result in dissatisfaction. Another operational risk is in the ability to consistently attract, retain and motivate managerial talent and other skilled personnel, especially in a high growth industry with unique characteristics. Further, some of the Company's resorts are located in remote areas and natural calamities such as earthquake, flood, landslide etc. may affect the accessibility of the resort to members as well as online connectivity.

The Company has invested significant resources in systems and processes to mitigate these risks. Customer satisfaction continues to be favourable and on an upward trend. Regarding room inventory, the Company will continue to be judicious in the use of different options – greenfield projects, expanding inventory at existing locations, lease and inventory arrangements – to meet the expectations of its customers and at the same time maintain a balance between demand and supply. Regarding talent management and retention, the management believes that its HR practices enhance employee engagement and satisfaction to effectively mitigate this risk.

Financial Risks

The Company's business involves significant investments in building resorts for its operations. These expose it to risks in terms of timely and adequate availability of funds at competitive rates to finance its growth. Besides, the Company offers its customers schemes to finance the purchase of the vacation ownership and similar products, which exposes it to credit risks. Another financial risk that the Company is exposed to is potential non-payment or delayed payment of membership instalments and/or the annual subscription fee by members resulting in higher outstanding receivables.

Currently, Mahindra Holidays has no long-term debt on a standalone basis, and has a strong and stable capital structure to raise money for further expansion, if needed. The Company undertakes comprehensive assessment of the profile of its customers and carefully monitors its exposure to credit risk. Besides, several improvements in control and monitoring mechanisms have been made to reduce risks of potential leakages and aid the management in this process.

Regulatory and Legal Risks

Mahindra Holidays is exposed to regulatory and legal risks. These include cumbersome processes and risks relating to land acquisition, conversion of land for commercial usage and development of properties, environmental clearances, approvals and activities related to development of new resorts. There are also other regulatory and legal risks pertaining to tax proceedings, legal proceedings on properties, customer complaints, non-compliance of regulations including environmental regulations and those pertaining to the hospitality sector. Further, as the Company has investments

and operations in different countries, it is also exposed to political and regulatory risks that emanate from its international presence.

The Company has systems and controls in place to mitigate these risks and minimise instances of non-compliance. It also believes that its proactive stance on sustainability will hold it in good stead for future development and growth.

Outlook

Mahindra Holidays performed creditably in 2015-16. The Company's strategy to generate more pull-based business and efficiencies in execution has been instrumental in delivering superior performance during the year, even as the Company faced headwinds in the form of low consumer disposition towards high-value discretionary spends.

At a fundamental level, the Company believes that penetration of vacation ownership in India is low and there is considerable room for growth. Consistent improvements in member satisfaction and ability to deliver family-friendly experiences on a larger scale have validated the Company's investments in technology and processes, and at the same time improved its competitive positioning in the leisure travel industry.

The Company's wide presence with 45 resorts offering a variety of experiences for its members provides it with an unmatched opportunity in the vacation ownership business in India. Four of its greenfield projects currently under execution are on schedule and expected to add another 500 units over the next few years.

Equally, the acquisition of HCR opens up growth opportunities in Europe and Middle East besides allowing 'Club Mahindra' members to visit HCR's resorts in Europe. Improvement in the macroeconomic performance expected in 2016-17, is likely to provide a further boost to the Company's prospects. All of these should augur well for the Company's performance in the future.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1(f) under 'Report on Other Legal and Regulatory Requirements' of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Mahindra Holidays & Resorts India Limited ("the Company") as of March 31, 2016 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal

financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing whether a risk material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures

of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

(v) Cash flow statements:

Requests for cancellation of membership are accounted for when it is accepted by the Company. In respect of installments considered doubtful of recovery by the management, the membership is treated as cancelled and related revenues are de-recognised.

- (f) Income from travel services includes commission on tickets/hotel booking, service charges from customers, etc. and is recognised when services are rendered.

(viii) Other Income:

The cost of fixed assets comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use. Subsequent

expenditure on fixed assets after its purchase / completion is capitalised only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

Capital work-in-progress:

Projects under which tangible fixed assets are not yet ready for their intended use are carried at cost, comprising direct cost, related incidental expenses and attributable interest. Revenue expenses incurred in connection with construction of resorts insofar as such expenses relate to the period prior to the date the resort is put to use are treated as part of project cost and capitalised.

(x) Foreign currency transactions and translations:

Transactions in foreign currencies entered into by the Company are accounted at the exchange rates prevailing on the date of the transaction or at rates that closely approximate the rate at the date of the transaction. Exchange differences arising on settlement / restatement of foreign currency monetary assets and liabilities of the Company are recognised as income or expense in the Statement of Profit and Loss. Foreign currency monetary items of the Company, outstanding at the balance sheet date are restated at the year-end rates. Non-monetary items of the Company are carried at historical cost.

(xi) Investments:

Long-term investments are carried individually at cost less provision for diminution, other than temporary, in the value of such investments. Current investments are carried individually, at the lower of cost and fair value. Cost of investments include acquisition charges such as brokerage, fees and duties.

(xii) Employee benefits:

Employee benefits include provident fund, superannuation fund, employee state insurance scheme, gratuity fund and compensated absences.

Defined contribution plans:

The Company's contribution to provident fund, superannuation fund and employee state insurance scheme are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees.

Defined benefit plans:

For defined benefit plans in the form of gratuity fund, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial

NOTES FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2016

valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the schemes.

Short-term employee benefits:

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related service.

The cost of short-term compensated absences is accounted as under :

- (a) in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and
- (b) in case of non-accumulating compensated absences, when the absences occur.

Long-term employee benefits:

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date.

Employee Stock Option Scheme:

The compensation cost of stock option granted to employees is measured by Intrinsic Value method, which is the excess of market price of the underlying equity shares as of the date of grant over the exercise price of the option. This is recognised and amortised on straight line basis over the vesting period.

(xiii) Borrowing Cost:

Borrowing cost that are attributable to the acquisition, construction or production of qualifying

asset are capitalised as part of cost of such asset till such time as the asset is ready for its intended use or sale. A qualifying asset is an asset that necessarily requires a substantial period of time to get ready for its intended use or sale. All other borrowing costs are recognised as expenses in the period in which they are incurred.

(xiv) Segment reporting:

The Company identifies primary segments based on the dominant source, nature of risks and returns and the internal organisation and management structure.

(xv) Leases:

Assets leased by the Company in its capacity as a lessee, where substantially all the risks and rewards of ownership vest in the Company are classified as finance leases. Such leases are capitalised at the inception of the lease at the lower of the fair value and the present value of the minimum lease payments and a liability is created for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor are recognised as operating leases. Lease rentals under operating leases are recognised in the Statement of Profit and Loss on a straight-line basis over the lease term.

(xvi) Earnings per share:

Basic earnings per share is computed by dividing the profit after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are

NOTES FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2016

adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted for share splits / reverse share splits and bonus shares, as appropriate.

(xvii) Taxes on income:

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets are recognised for timing differences of items other than unabsorbed depreciation and carry forward losses only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. However, if there are unabsorbed depreciation and carry forward of losses and items relating to capital losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that there will be sufficient future taxable income available to realise the assets. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each balance sheet date for their realisability. Current and deferred tax relating to items directly recognised in reserves are recognised in reserves and not in the Statement of Profit and Loss.

(xviii) Impairment of assets:

The carrying values of assets / cash generating units at each balance sheet date are reviewed for impairment if any indication of impairment exists. If the carrying amount of the assets exceed the estimated recoverable amount, an impairment is recognised for such excess amount. The impairment loss is recognised as an expense in the Statement of Profit and Loss.

The recoverable amount is the greater of the net selling price and their value in use. Value in use is

arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss, to the extent the amount was previously charged to the Statement of Profit and Loss.

(xix) Provision and contingencies:

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent Liabilities are disclosed in the notes.

(xx) Share issue expenses:

Share issue expenses are adjusted against the Securities Premium Account as permissible under Section 52 of the Companies Act, 2013, to the extent any balance is available for utilisation in the Securities Premium Account. Share issue expenses in excess of the balance in the Securities Premium Account is expensed in the Statement of Profit and Loss.

(xxi) Insurance claims:

Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that the amount recoverable can be measured reliably and it is reasonable to expect ultimate collection.

(xxii) Service tax input credit:

Service tax input credit is accounted for in the books in the period in which the underlying service received is accounted and when there is reasonable certainty in availing / utilising the credits.

(xxiii) Operating cycle:

Based on the nature of services / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

The said shares will be added to the issued share capital as and when ESOP Trust issues the shares to the concerned persons on their exercising the option and till such shares are issued the amount received from ESOP Trust is disclosed under "other current liabilities".
- vi) The Company has adopted the intrinsic value method in accounting for employee cost on account of ESOS for Grant I (ESOS 2006), Grant II (ESOS 2006), Grant III (ESOS 2006) and Grant V (ESOS 2006) and for all the other grants, the fair value method has been adopted. The intrinsic value of the shares granted under Grant I (ESOS 2006), Grant II (ESOS 2006), Grant III (ESOS 2006) and Grant V (ESOS 2006) based on the valuations obtained from an independent valuer is ₹ 16 per equity share as on 31st March, 2006, ₹ 52 per equity share as on 1st January 2007, 31st August 2008 and 1st November 2008, based on the Discounted Cash Flow Method. The fair value of the shares granted under Grant VI (ESOS 2006), Grant VII (ESOS 2006), Grant VIII (ESOS 2006), Grant IX (ESOS 2006) and Grant III (ESOS 2014) based on the fair value market price is ₹ 370, ₹ 323, ₹ 323, ₹ 253 and ₹ 370 per share respectively. ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1(f) under 'Report on Other Legal and Regulatory Requirements' of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the consolidated financial statements of the Company as of and for the year ended March 31, 2016, we have audited the internal financial controls over financial reporting of Mahindra Holidays & Resorts India Limited (hereinafter referred to as "the Holding Company") and its subsidiary companies, which are companies incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding Company and its subsidiary companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing, prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over

financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk.

The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors of the subsidiary companies, which are companies incorporated in India, in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion to the best of our information and according to the explanations given to us, the Holding Company and its subsidiary companies, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Other Matters

Our aforesaid report under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting insofar as it relates to two subsidiary companies, which are companies incorporated in India, is based on the corresponding reports of the auditors of such companies incorporated in India.

Investment in Guestline Hospitality Management and Development Services Limited (GHMDSL):

The Company holds 25,000,7% participating optionally convertible preference shares of ₹ 10/- each in GHMDSL amounting to ₹ 250,000, out of its total share capital (including equity share capital) of ₹ 500,600 (49.94%). The Company has not considered the financials of GHMDSL for consolidation since the above investment is acquired and held exclusively with a view to its subsequent disposal in the future.

1.3 Principles of Consolidation

The financial statements of the Company and its subsidiaries have been consolidated on a line by line basis by adding together the book value of like items of assets, liabilities, income, expenses, after eliminating intra-group transactions and any unrealised gains or losses on the balances remaining within the group in accordance with Accounting Standard - 21 (AS 21) on "Consolidated Financial Statements" notified by the Central Government of India under The Companies (Accounting Standards) Rules, 2006.

The difference between the cost of investment in the subsidiaries over the Company's portion of equity of the subsidiary on the date of investment is recognised in the financial statements as Goodwill or Capital Reserve as appropriate. The 'Goodwill' /

'Capital Reserve' is determined separately for each subsidiary company / jointly controlled entity and such amounts are not set off between different entities.

Goodwill on consolidation is tested for impairment on an annual basis.

The financial statements of the Company and its subsidiaries have been consolidated using uniform accounting policies for like transactions and other events in similar circumstances except in case of Consolidation goodwill of HCR Oy which is amortised over the period of ten years and tested for impairment annually . Also Refer note 2(i).

The consolidated financial statements include the share of profit in an associate company which has been accounted for using equity method as per AS

NOTES FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2016

23 "Accounting for Investments in Associates in Consolidated Financial Statements". Accordingly, the share of profit of the associate company has been added to the cost of investments.

The Company's interest in the Jointly Controlled entity is consolidated as per Accounting Standard 27 "Financial Reporting of Interests in Joint Ventures", on a line-by-line basis by adding together the book values of assets, liabilities, income and expenses, after eliminating the unrealized profits/losses on intra group transactions.

Minority Interest in the net assets of the consolidated subsidiaries consist of the amount of equity attributable to the minority shareholders at the date on which investments in the subsidiary companies were made and further movements in their share in the equity, subsequent to the dates of investments. Net profit / loss for the year of the subsidiaries attributable to minority interest is identified and adjusted against the profit after tax of the Group in order to arrive at the income attributable to shareholders of the Company.

2 Significant Accounting Policies

(i) Basis for preparation of accounts:

The consolidated financial statements of Mahindra Holidays & Resorts India Limited ("the Company"), its subsidiaries and jointly controlled entity have been prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP) to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules, 2014 and the relevant provisions of the Companies Act, 2013 ("the 2013 Act") as applicable. The financial statements have been prepared on accrual basis under the historical cost convention. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

(ii) Use of estimates:

The preparation of financial statements in conformity with Indian GAAP requires the management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the years in which the results are known / materialise.

(iii) Inventories:

Inventories are carried at lower of cost and net realisable value. Cost is determined on First-in-First-out basis. Cost includes the purchase price, non refundable taxes and delivery handling cost. Net realisable value is determined at the expected selling price less cost of sales.

Construction work in progress in case of "Villa timeshare products" of HCR Oy, an overseas subsidiary includes cost of land, construction costs and allocated interest and expenses attributable to the projects undertaken by the company.

Vacation ownership weeks held by HCR Oy is held at lower of cost and net realisable value and cost is determined based on specific identification to a property.

(iv) Cash and cash equivalents:

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

(v) Cash flow statements:

Cash flows are reported using the indirect method, whereby profit before extra-ordinary items and tax is adjusted for the effects of transactions of non cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flow from operating, investing and financing activities of the Company are segregated based on the available information.

(vi) Depreciation and amortisation:

Depreciation on tangible fixed assets has been provided on the straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013 except in respect of the following categories of assets, in whose case the life of the assets has been assessed as under taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers warranties and maintenance support, etc.

- Leasehold land and buildings are amortised over the period of lease.
- Floating cottages grouped under building are depreciated over the useful life of 25 years.
- Furniture and Fixtures in 'Club Mahindra Holiday World' are amortised over a period of 36 months.

NOTES FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2016

- (e) Assets individually costing less than ₹ 5,000 each are fully depreciated in the year of capitalisation.

Intangible assets

- (f) Expenditure incurred towards software is amortised over a period of 36 months.
- (g) Group goodwill in case of HCR Oy is amortised over 10 years, since the useful life of the acquired operations are considered to be at least 10 years.

The estimated useful life of the intangible assets and the amortisation period are reviewed at the end of the each financial year and the amortisation method is revised to reflect the changed pattern, if any.

The tangible/intangible assets of the overseas operations have also been depreciated based on useful life, estimated by the respective managements on a straight line basis.

(vii) Revenue recognition:

- (a) The Company's business is to sell Vacation ownership and provide holiday facilities to members for a specified period each year, over a number of years, for which membership fee is collected either in full upfront, or on a deferred payment basis. Admission fee, which is non-refundable, is recognized as income on admission of a member. Entitlement fee (disclosed under Deferred income – Entitlement fee), which entitles the vacation ownership members for the vacation ownership facilities is recognized as income equally over the tenure of membership (33 years / 25 years / 10 years or any other tenure applicable to the respective member), commencing from the year of admission of each member. Requests for cancellation of membership are accounted for when it is accepted by the Company. In respect of instalments considered doubtful of recovery by the management, the membership is treated as cancelled and related revenues are de-recognized.
- (b) Revenue from "sale of vacation ownership weeks" is recognised when related right to use the specific property over the specific week(s) is transferred to the buyer for a consideration, which coincides with transfer of significant risks and rewards of ownership.
- (c) "Income from "sale of vacation ownership weeks in villas"" is recognized when the outcome of a Villa project can be estimated reliably; Project revenue and contract costs

associated with the contract are recognised as revenue and expenses respectively by reference to the percentage of completion of the project activity at the reporting date. The percentage of completion of a contract is determined considering the proportion that project costs incurred for work performed upto the reporting date bear to the estimated total projects costs. Outcome of a project necessarily involves technical estimates of the percentage of completion of each project, and costs to completion of the project, on the basis of which profits/ losses are accounted. Such estimates, made by the management and certified to the auditors, have been relied upon by them, as these are of a technical nature. When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense in the Statement of Profit and Loss in the period in which such probability occurs.

- (d) Annual subscription fee dues from members are recognised as income over the period of subscription as per terms agreed with the members. Subscription pertaining to the period beyond the date of the Balance Sheet is grouped under Deferred Income - Annual subscription fee.
- (e) Interest on instalment sales is recognised as income on an accrual basis.
- (f) Income from resorts includes income from room rentals, food and beverages, etc. and is recognised when services are rendered.
- (g) Securitised assets are derecognised as the contractual rights therein are transferred to the third party. On being derecognised, the excess of consideration received over the principal amounts of receivable from members (net of reversals in respect of cancelled members) is recognised as income from Securitisation.
- (h) Income from travel services includes commission on tickets/hotel booking, service charges from customers, etc. and is recognised when services are rendered.
- (i) Rental income from retail premises in case of HCR Oy are recognized on a straight-line basis over the rental period.

NOTES FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2016

(ix) Fixed assets - Tangible and intangible:

Fixed assets are carried at cost less accumulated depreciation / amortisation and impairment losses, if any. The cost of fixed assets comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use. Subsequent expenditure on fixed assets after its purchase / completion is capitalised only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

Capital work-in-progress:

Projects under which tangible fixed assets are not yet ready for their intended use are carried at cost, comprising direct cost, related incidental expenses and attributable interest. Revenue expenses incurred in connection with construction of resorts insofar as such expenses relate to the period prior to the date the resort is put to use are treated as part of project cost and capitalised.

Cost of renovation in case of HCR Oy:

Ordinary repair and maintenance costs are expensed as they incur. Significant renovations or additional investments are capitalized and depreciated over the remaining useful life of the asset, if it is probable that the future benefits associated with the asset will benefit the company.

(x) Foreign currency transactions and translations:

Transactions in foreign currencies entered into by the Company are accounted at the exchange rates prevailing on the date of the transaction or at rates that closely approximate the rate at the date of the transaction. Exchange differences arising on settlement / restatement of foreign currency monetary assets and liabilities of the Company are recognised as income or expense in the Statement of Profit and Loss. Foreign currency monetary items of the Company, outstanding at the balance sheet date are restated at the year-end rates. Non-monetary items of the Company are carried at historical cost.

Integral Operations :

Transactions in foreign currencies entered into by the Company's integral foreign operations are accounted at the exchange rates prevailing on the date of the transaction or at rates that closely approximate the rate at the date of the transaction. Foreign currency monetary items (other than

derivative contracts) of the Company's integral foreign operations outstanding at the Balance Sheet date are restated at the year-end rates. Non-monetary items of the Company's integral foreign operations are carried at historical cost. Exchange differences arising on settlement / restatement of foreign currency monetary assets and liabilities of the Company's integral foreign operations are recognised as income or expense in the Consolidated Statement of Profit and Loss.

With respect to long-term foreign currency monetary items, the Company has adopted para 46 / 46A of AS 11 as follows :

The exchange differences arising on settlement / restatement of long-term borrowings in case of two overseas subsidiaries is amortised over the maturity period / upto the date of settlement of such monetary items, whichever is earlier, and charged to the Consolidated Statement of Profit and Loss. The unamortised exchange difference is carried under Reserves and surplus as "Foreign currency monetary item translation difference account". A monetary liability is termed as a long-term foreign currency monetary item, if the liability is expressed in a foreign currency and has a term of 12 months or more at the date of origination of the asset or liability.

Non-integral Operations :

Transactions of non-integral foreign operations are translated at the exchange rates prevailing on the date of the transaction or at rates that closely approximate the rate at the date of the transaction. All assets and liabilities of non-integral foreign operations are translated at the year-end rates. The exchange differences relating to non-integral foreign operations are accumulated in a "Foreign currency translation reserve" until disposal of the operation, in which case the accumulated balance in "Foreign currency translation reserve" is recognised as income / expense in the same period in which the gain or loss on disposal is recognised.

Change in classification of foreign operation:

When a foreign operation that is integral to the operations of the Company is reclassified as a non-integral operation, exchange differences arising on the translation of non-monetary items at the date of such reclassification are accumulated in the "Foreign currency translation reserve" account. When a non-integral foreign operation is reclassified as an integral foreign operation, the translated amounts for non-monetary items at the date of the change are treated as the historical cost for those items in the period of change and subsequent periods. Exchange differences that have been deferred are not recognised as income

NOTES FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2016

or expense until the disposal of the operation. Subsequent to the date of change in classification of the foreign operation, transactions and balances in such operations are accounted as per the accounting policy applicable to the new classification.

(xi) Investments:

Long-term investments are carried individually at cost less provision for diminution, other than temporary, in the value of such investments. Current investments are carried individually, at the lower of cost and fair value. Cost of investments include acquisition charges such as brokerage, fees and duties.

(xii) Employee benefits:

Employee benefits include provident fund, superannuation fund, employee state insurance scheme, gratuity fund and compensated absences.

Defined Contribution Plan:

The Company's contribution to provident fund, superannuation fund and employee state insurance scheme are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees.

Defined Benefit Plan:

For defined benefit plans in the form of gratuity fund, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the schemes.

Short-term employee benefits:

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the

end of the period in which the employee renders the related service.

The cost of short-term compensated absences is accounted as under :

- (a) in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and
- (b) in case of non-accumulating compensated absences, when the absences occur.

Long-term employee benefits:

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date.

Employee Stock Option Scheme:

The compensation cost of stock option granted to employees is measured by Intrinsic Value method, which is the excess of market price of the underlying equity shares as of the date of grant over the exercise price of the option. This is recognised and amortised on straight line basis over the vesting period.

(xiii) Borrowing Costs:

Borrowing cost that are attributable to the acquisition, construction or production of qualifying asset are capitalized as part of cost of such asset till such time as the asset is ready for its intended use or sale. A qualifying asset is an asset that necessarily requires a substantial period of time to get ready for its intended use or sale. All other borrowing costs are recognized as expenses in the period in which they are incurred.

(xiv) Leases:

Assets leased by the Company in its capacity as a lessee, where substantially all the risks and rewards of ownership vest in the Company are classified as finance leases. Such leases are capitalised at the inception of the lease at the lower of the fair value and the present value of the minimum lease payments and a liability is created for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor are recognised as operating leases. Lease rentals under operating leases are recognised in the Statement of Profit and Loss on a straight-line basis over the lease term.

NOTES FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2016

(xv) Earnings per share:

Basic earnings per share is computed by dividing the profit after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted for share splits / reverse share splits and bonus shares, as appropriate.

(xvi) Taxes on income:

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets are recognised for timing differences of items other than unabsorbed depreciation and carry forward losses only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. However, if there are unabsorbed depreciation and carry forward of losses and items relating to capital losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that there will be sufficient future taxable income available to realise the assets. Deferred tax assets

and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each balance sheet date for their realisability. Current and deferred tax relating to items directly recognised in reserves are recognised in reserves and not in the Statement of Profit and Loss.

(xvii) Impairment of assets:

The carrying values of assets / cash generating units at each balance sheet date are reviewed for impairment if any indication of impairment exists. If the carrying amount of the assets exceed the estimated recoverable amount, an impairment is recognised for such excess amount. The impairment loss is recognised as an expense in the Statement of Profit and Loss.

The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss, to the extent the amount was previously charged to the Statement of Profit and Loss.

(xviii) Provision & contingencies:

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent Liabilities are disclosed in the notes.

(xix) Share issue expenses:

Share issue expenses are adjusted against the Securities Premium Account as permissible under Section 52 of the Companies Act, 2013, to the extent any balance is available for utilisation in the Securities Premium Account. Share issue expenses in excess of the balance in the Securities Premium Account is expensed in the Statement of Profit and Loss.

(xx) Insurance claims:

Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and

NOTES FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2016

to the extent that the amount recoverable can be measured reliably and it is reasonable to expect ultimate collection.

(xxi) Service tax input credit:

Service tax input credit is accounted for in the books in the period in which the underlying service received is accounted and when there is reasonable certainty in availing / utilising the credits.

(xxii) Government Grants:

Grants received by the Company are recorded as other operating income in the Profit and Loss statement during the periods in which the related expenses are incurred. Grants for acquisition of fixed assets are recorded in the Balance Sheet as deferred income and recognized in the Profit and Loss statement as revenue over the asset's systematical depreciation period.

(xxiii) Derivative instruments and hedge accounting:

The Company's overseas subsidiaries enter into derivative contracts in the nature of interest rate swaps to hedge the interest rate risk on its borrowings. The companies have applied hedge accounting principles set out in Accounting Standard 30 'Financial Instruments : Recognition and Measurement' (AS 30) to such contracts by marking them to market at each reporting date; Changes in the fair value of the contracts are recognised in the Statement of Profit and Loss.

(xxiv) Operating cycle:

Based on the nature of services / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

29 HCR and MHR Hotels had entered into interest rate swap agreements to manage interest rate risk exposures. The interest rate swap effectively modified the Company's exposure to interest rate risk by converting the Company's floating rate debt to a fixed rate basis for the entire term of the debt, thus reducing the impact of interest rate changes on future interest expense. This agreement involves the receipt of floating rate amounts in exchange for fixed rate interest payments over the life of the agreement without an exchange of the underlying borrowing amount. The full fair value of the hedging derivative is classified as current/non-current liability based on the maturity term of the hedged. For the hedged instruments with maturity within one year are classified as current and those beyond one year are classified as Non- Current. The total number of interest swaps outstanding as on March 31, 2016 is ten.
